

THE WEINMAN SINGLE STAGE SPLIT CASE PUMP

HIGH CAPACITY PUMPING

- ◆ CENTRAL PLANT CHILLED WATER
- ◆ COOLING TOWERS
- ◆ CLASS-A HIGH RISE OFFICE SPACE
- ◆ PROCESS COOLING
- ◆ AIR WASHERS
- ◆ BIOTECHNOLOGY AND PHARMACEUTICAL INDUSTRY

THE WEINMAN ADVANTAGE

Unquestionable quality. That's what industry professionals think when they think of Weinman pumps. The Weinman single stage split case pump is no exception. While other companies boast of high capacity split case pumps, the Weinman split case design combines the most in quality, space efficiency, and overall capacity of any pump on the market.

WORRY FREE MAINTENANCE — BY DESIGN.

With Weinman's unique flip top casing, the entire rotating element can be removed for inspection without disturbing pipe connections or exposing bearings. And because no "*pullout*" is necessary to open the casing, no extra space is needed for servicing.

STANDARD FEATURES THAT INCREASE THE LIFE OF YOUR PUMP.

Weinman's standard flush seal lines continuously purge seal of sand, grit, and scale, greatly reducing wear and tear on your pump. And, rugged, moisture proof housings for bearings minimize the #1 cause of most pump failures - *worn out bearings*.

CAPACITIES.

Twenty-eight different models of single stage split case pumps are available, with capacities of up to **7000 GPM** and **400 feet** of head.
